

QHSE POLICY

Bluewhale Offshore shall adhere to the following core business principles:

Quality Management

The Company shall monitor, measure and review performance to achieve continual improvement, performance optimisation and business growth. This shall be accomplished through the application of our Business Process Flow methodology, risk based thinking and life cycle approach.

Availability and Review

The Company's Integrated Management System shall be made available to all users with acknowledgement, consultation, commitment and compliance to all requirements ensured. In addition, the Integrated Management System shall be reviewed through the application of our Business Process Flow methodology.

Health Safety Environment

Through the application of recognised industry, situational and behavioural based tools the Company shall evaluate and mitigate occupational, environmental and process risk to as low as reasonably practicable. Priority shall be given to effective communication, consultation and participation to engage, inform, motivate and safeguard people, environment and asset.

Stop Work Authority

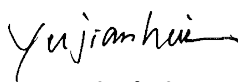

The Company empower all employees to report all unsafe activity or conditions and to **STOP** such work until appropriate risk control measures are in place and confirmed as effective.

Security

The Company shall allocate sufficient resources for the Company Security Officer and Ship Security Officers to ensure compliance with the International Ship and Port Facility Security (ISPS) Code.

Standards and Compliance

The Company's Integrated Management System shall be designed and maintained to comply with all regulations, codes, standards and industry requirements, relevant to our business activities and area of operation. In case of conflict the Company shall, in consultation with customers and interested parties, apply the most relevant and stringent solution.
